Ayesha Raza

AI/ML Engineer - LLM apps, RAG and predictive models | Lahore, Pakistan (synthetic) | 5 years freelancing (synthetic persona)

Summary

Freelancer focused on ai_ml, data_science. Prefers well-scoped projects with measurable outcomes.

Skills

AWS SageMaker, Churn prediction, Computer vision, FastAPI, Hugging Face Transformers, LLM fine-tuning, LangChain, LangGraph, LightGBM, MLflow, Model evaluation, NLP, OpenAI API, Prophet, PyTorch, Python, RAG, Recommendation systems, Time series forecasting, XGBoost, YOLO, scikit-learn, spaCy

Selected experience

- Lead scoring for a B2B sales team (2025-06, SaaS): top-scored 20% of leads converted at 3.1x the base rate.
- Fine-tuned tone model for customer emails (2025-04, SaaS): brand-voice rating from reviewers rose from 2.9 to 4.3 out of 5.
- Async document-processing pipeline (2025-03, Legal): uploads of any size returned in under a second; 0 lost documents in 3 months.
- Multi-agent research assistant (2025-01, Consulting): first drafts in 15 minutes, analysts kept 70% of generated text after review.
- Model training on Amazon with a hosted endpoint (2024-12, Healthcare): no-show prediction AUC 0.84; reminder calls targeted to the riskiest 20% of bookings.
- Semantic product search (2024-10, E-commerce): zero-result searches fell from 14% to 3%.
- Invoice field extraction (2024-08, Finance): 94% field accuracy, saving roughly 30 staff hours a week.
- Defect detection on a bottling line (2024-05, Manufacturing): 98.2% recall on cracked caps at 25 frames per second on a CPU.
- Experiment tracking rollout (2024-03, Fintech): every production model traceable to code, data and metrics; audit passed first time.

Education

BS Computer Science (synthetic university)

Certifications

- AWS Certified Machine Learning - Specialty (2024)
